EDUCATION

Pan-Atlantic University **Ibeju Lekki, Lagos, Nigeria**
BSc. Computer Science *October 2022 - December 2026*
Second Class Upper (2:1) CGPA: 4.16

TECHNICAL SKILLS

Programming: Python, JavaScript, C++, HTML, CSS
Development: React, FastAPI, SQLite, MySQL, Git
AI/ML: Prototyping, Wireframing, User Research, User Flow Design

UX/Product: User Research, Requirements Gathering, User Flows, Wireframing, Prototyping, User Centered Design
Other: Software Testing, Technical Troubleshooting, Data Visualization, Deployment

WORK EXPERIENCE

UX/UI Design Intern
MTN Telecommunications, Lagos, Nigeria *July 2025 - September 2025*

- Contributed to the design of an intern management system, mapping 5+ key user flows to improve navigation and task completion.
- Created 10+ wireframes and UI screens in Figma based on user requirements and design specifications.
- Participated in multiple design reviews and assessments, incorporating feedback from senior designers to refine usability and visual consistency.

IT Support Officer
Total Energies Limited, Lagos, Nigeria *July 2024 - September 2024*

- Provided first-line technical support to 100+ staff, diagnosing and resolving hardware, software, and system access issues.
- Assisted staff in resolving system access and usability challenges.
- Supported routine system maintenance to ensure smooth daily operations.
- Documented and communicated technical issues clearly to support efficient resolution.

PROJECTS

- **MTN Internship Management System**: Worked as part of a design team to map user flows and design interface screens for an intern management system, structuring workflows based on user needs to make tasks more intuitive and user-friendly.
- **Social Media Application (gConnect)**: Worked as part of a design team to conduct user research and define key features and requirements, and contributed to designing wireframes and high-fidelity interfaces for core user journeys while maintaining consistency through a simple design system.
- **Explainable Loan Eligibility Assessment for Nigerian SMEs**:Independently built a full-stack AI-enabled decision-support system using React, FastAPI/Python, SQLite, ChromaDB, and Hugging Face/Qwen. Implemented Retrieval-Augmented Generation (RAG), embeddings, eligibility scoring, and semantic retrieval to provide grounded explanations based on Bank of Industry YES-P eligibility criteria. Designed personalized text and radar-chart feedback to help users understand their eligibility results, strengths, and application gaps.

EXTRACURRICULAR ACTIVITIES

- **President, Pan-Atlantic University Women in STEM (PWIS)**Led an 8-member executive team to deliver STEM events, mentorship programmes, and community initiatives. Led She Creates, PWIS's flagship conference, bringing together approximately 100 participants and STEM professionals while coordinating speakers, sponsorship activities, logistics, and overall event delivery..- September 2025 - June 2026
- **Head of Event Planning, School of Science and Technology (SST) Committee** Coordinate planning and execution of departmental events, working with teams to manage logistics, scheduling, and attendee experience to ensure smooth delivery of academic and social programs. - March 2025 - November 2025
- **FIG Tutor (First-Year Integration Group)** Mentored first-year students by facilitating weekly group sessions, answering academic and university-related questions, sharing study strategies and resources, and helping students navigate their transition into university life. - October 2024 - March 2025
